TNX QSL via OE2DYL DIETER KONRAD
5020 Salzburg, Bessarabierstraße 39

vy 73 *Dieter*

Nauru, a small island of only 22 sq.km lies just 41 km south of the equator. Due to its easily accessible phosphate deposits it is the richest country in the world. After digging out the phosphate there stay only rocks and by the year 2000 the island will be complete desert and abandoned. Many thanks to Mr. John Duncan, C21JD, who made it possible for us to use the C21NI call. During 4 days we made 6000 QSOs with 101 countries. The whole dx-pedition took us to KH6, KH8, 5W1, ZK2, C21, T30 and T2 for a grand total of nearly 33000 QSOs. Special thanks to ÖVSV and NCDXF for supporting our operation.
